

Leverage Your Existing Printing Environment to Enable Users to Print Natively from Mobile Devices.

Key Benefits:

- Increase productivity for end users by enabling native printing across all their devices
- Access printers in your office home, or wherever you are
- Decrease time spent managing print servers by reducing 32- and 64-bit compatibility issues
- Decrease wait time for print jobs by increasing printer performance
- Increase security by securing AirPrint printers
- Provide mobile device access to legacy printers
- Agentless Printing with integration into Google Cloud Print

- Small database "spoofs" all network and USB printers as AirPrint™ printers.
- Each user can then print from any printer they have access to, via iOS or Android devices.
- Users can self-select all printers, virtually eliminating ongoing IT Administration.
- Enables guest/vendor printing, without giving access to network resources beyond Wi-Fi.
