

tricerat[®] + VMware Better Together

A VMware Partner since 2007.

Why Tricerat

When out-of-the-box functionality doesn't fit, Tricerat and VMware work better together. Add Tricerat's pioneering print technology to the VMware virtual mix achieves printing success, no matter the client type or mobile device your workforce is on.

Features

- » Horizon View & ThinApp
- » VDI sessions
- » Follow me printing
- » Google Cloud Print
- » iOS & Android devices
- » Secure & PIN print
- » Google Cloud Print
- » Thin & zero clients

Benefits

No terminal, application server, or image print drivers to manage. Increase user productivity by speeding up logon times and eliminating spooler crashes. Less time spent managing print servers by reducing compatibility issues.

Cross Environment Compatibility

Tricerat works across multiple platforms such as VMware, Citrix, Microsoft, Ericom, and physical workstation environments.

Single Drag and Drop Console

Manage your enterprise wide printing from a single drag and drop console. No scripting, GPOs, or VMware policies.

Advanced Print Features

Pass through all manufacturer's advanced print features for use in VMware sessions without installing drivers on all machines.

Automatically Enabled Printer Assignment

Automatically assign printers after installation. Administrators no longer have to be highly skilled in VMware policy scripting.

Proximity Printing/Print-On-The-Go

Give your users access to the printers they need, when they need them. Assign printers based on location, profile, or workstation.

Increased Server Performance

Improve system performance by reducing print spooler crashes and printing backups.
